

Private Equity Analyst

About GP Investments

GP Investments is a leading private equity and alternative investments firm. With offices in São Paulo, New York City, London, and Bermuda, GP Investments has raised over US\$5 billion and invested in more than 50 companies in Brazil, USA, UK and LatAm. GP has raised close to US\$8 billion in more than 30 capital market transactions through its portfolio companies.

Our firm is best known for its deep involvement with its portfolio companies and a distinctive managerial model. This model's cornerstone is a culture that emphasizes values such as meritocracy, ownership, trust and a ceaseless commitment to achieving results. We seek to build long-lasting enterprises by putting in place strong governance, strategic leadership, cost consciousness, the right incentives, and a strong team.

Position Description

GP Investments is seeking a Private Equity Analyst for its São Paulo office, who will work with other members of the private equity team in a collaborative, dynamic environment. The analyst will research industries and individual companies, lead potential investment projects and support the monitoring of portfolio companies with ad hoc assignments. The analyst's responsibilities will include:

- Mapping various sectors and companies, seeking to identify attractive investment themes
- Researching, analyzing and evaluating potential investment targets, both in the private and public equity spaces
- Developing investment memos, financial models and business plans and presenting them to the broader investment team
- Working with multiple advisors and partners to structure potential transactions and diligence targets

Qualifications

- Previous experience in Private Equity, Strategy Consulting, Finance or related fields is encouraged
- Up to two years since graduation
- Fluency in English
- Strong analytical, financial modeling and communication skills
- Solid work ethic and ability to work both independently and in small groups
- Ability to manage multiple work streams concurrently
